### About me

I write websites and client-side web application components using HTML, CSS, JavaScript, matching the design down to the pixel. I create my projects in a modular fashion, using SASS, GULP, Webpack, AJAX, GIT, GitHub, with automated build and deployment to the server. I can create animations both in CSS and JavaScript.

I have basic knowledge of Python and Linux.

You can view my work on the website: <https://insight-webstudio.ru/> , or on my GitHub: <https://github.com/Belaz4x4>

Currently, I work as a curator for frontend development courses, where I review assignments, delve into students' code, and help them solve development issues.

I am seeking employment in frontend development and plan to grow into a full-stack developer.

Previous Experience:

Since late 2021, I have been studying programming. I started with learning Python, but my course was closed for revision and never reopened. While waiting, I tried frontend development, and I liked it more. So now I am continually developing in this direction.

I have a higher technical education in the field of automotive engineering and automotive management. I graduated from the Northern Arctic Federal University in 2010. Among the IT-related disciplines were advanced mathematics, Pascal programming, and work in CAD systems such as Kompas and SolidWorks.

Previous work experience in managerial positions taught me team-based project work using CRM

systems, finding technological solutions for company tasks, implementing, enhancing, and testing software products. I developed procurement systems based on 1C reports and Excel calculations. I introduced a major module automating the supply processes for a network of stores. I designed a business process for handling customer complaints using CRM forms. I developed business processes and selected software solutions for the remote sales department.

I am a responsible employee who sees tasks through to completion. I can effectively communicate my ideas to others. I am interested in learning new things and growing as a professional.

My hobbies include traveling, yachting, playing the guitar, and motorcycles.
